

Visuals for Spanish Flu Project Report

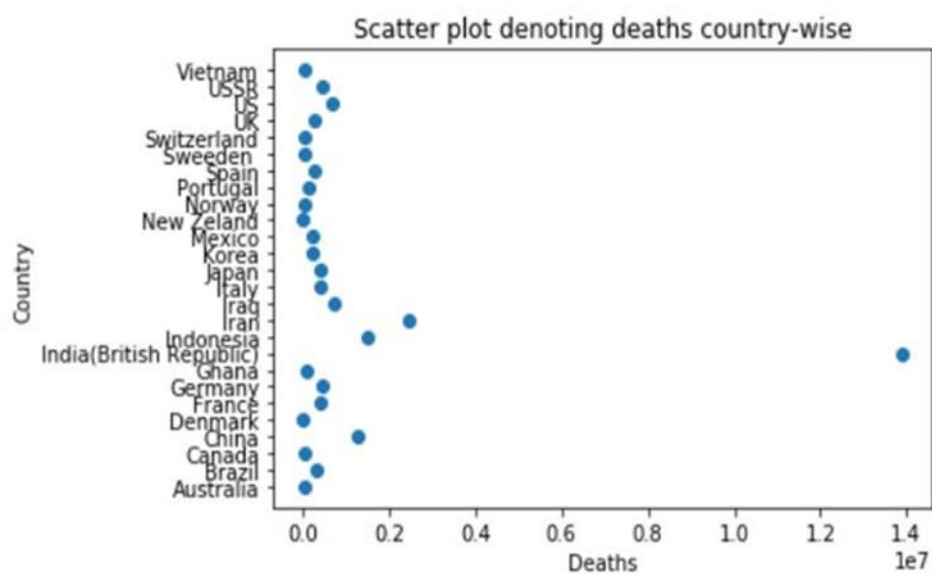

The first official cases of the 1918 Spanish flu pandemic were recorded at the U.S. Army's Camp Funston, Kansas.

Country	Estimated Deaths(UpperLimit)	Country	Estimated Deaths(UpperLimit)
Australia	15000.0	Japan	390000.0
Brazil	300000.0	Korea	200000.0
Canada	50000.0	Mexico	230500.0
China	1280000.0	New Zeland	8900.0
Denmark	5000.0	Norway	15000.0
France	400000.0	Portugal	118065.0
Germany	426600.0	Spain	260000.0
Ghana	100000.0	Sweedden	34500.0
India(British Republic)	13880000.0	Switzerland	25000.0
Indonesia	1500000.0	UK	250000.0
Iran	2431000.0	US	675000.0
Iraq	700000.0	USSR	450000.0
Italy	410000.0	Vietnam	33000.0

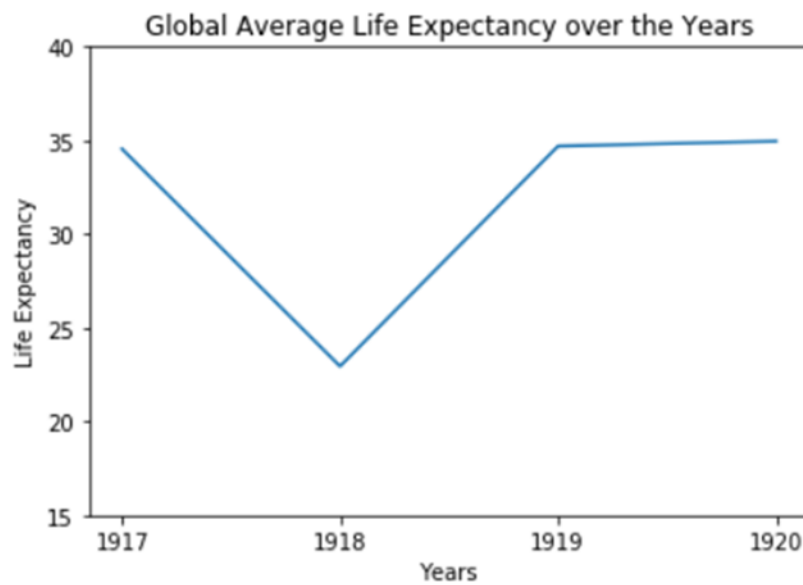

Approximate deaths in various countries.

The time waves hit these European Nations.

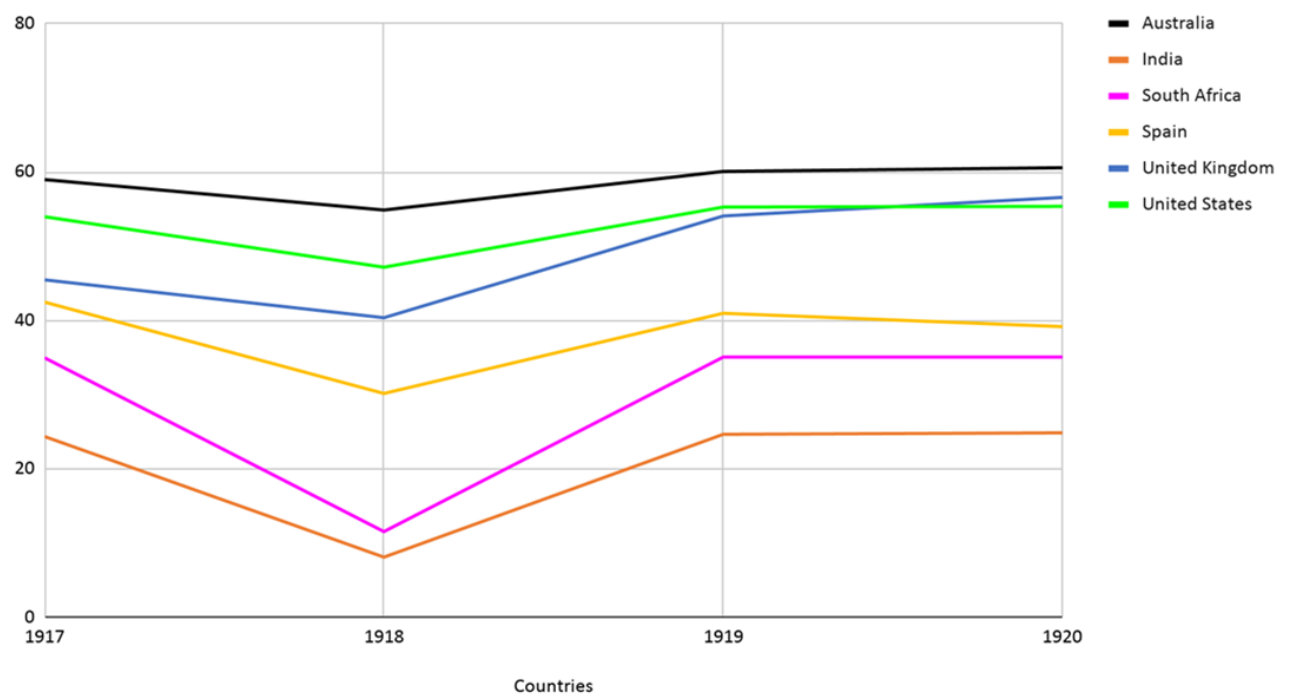

Scatterplot denoting country-wise deaths.

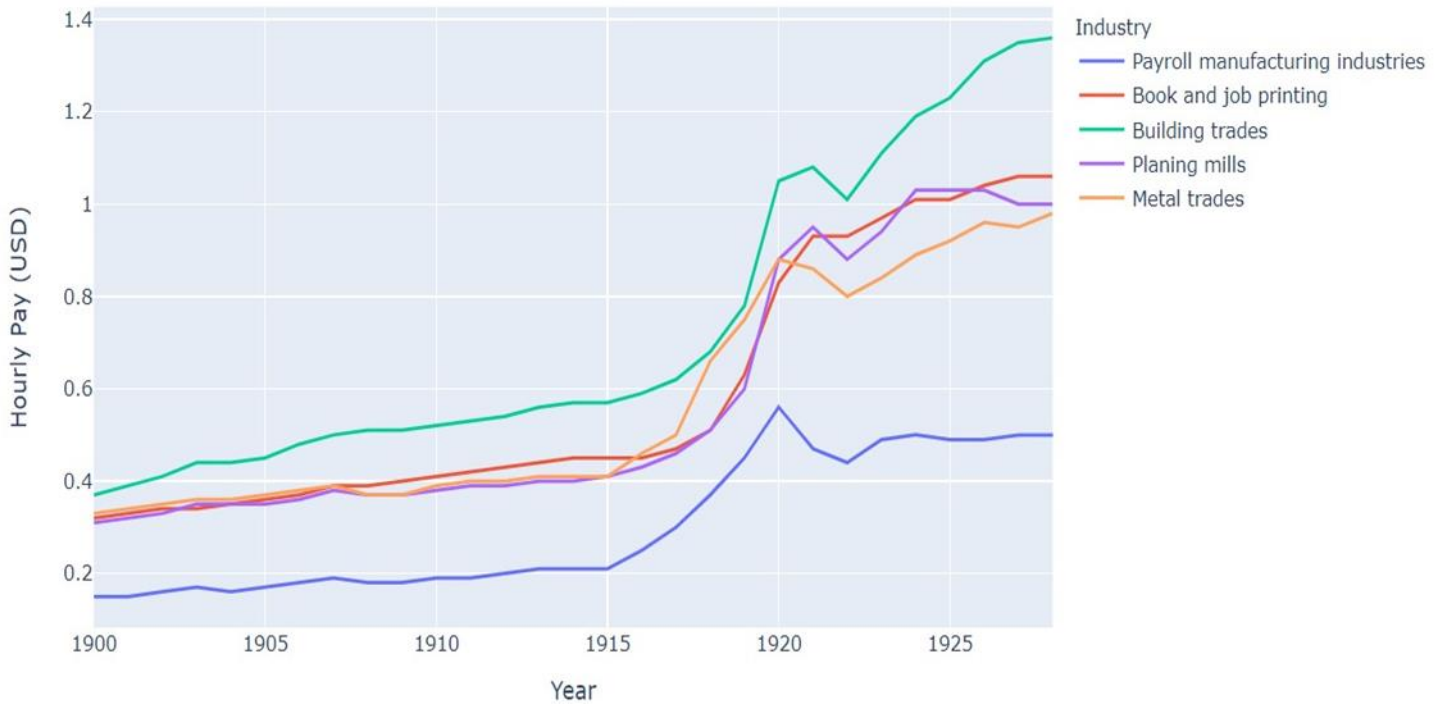

Global average life expectancy from 1917 to 1920.

Life Expectancy During "Spanish" Flu Pandemic

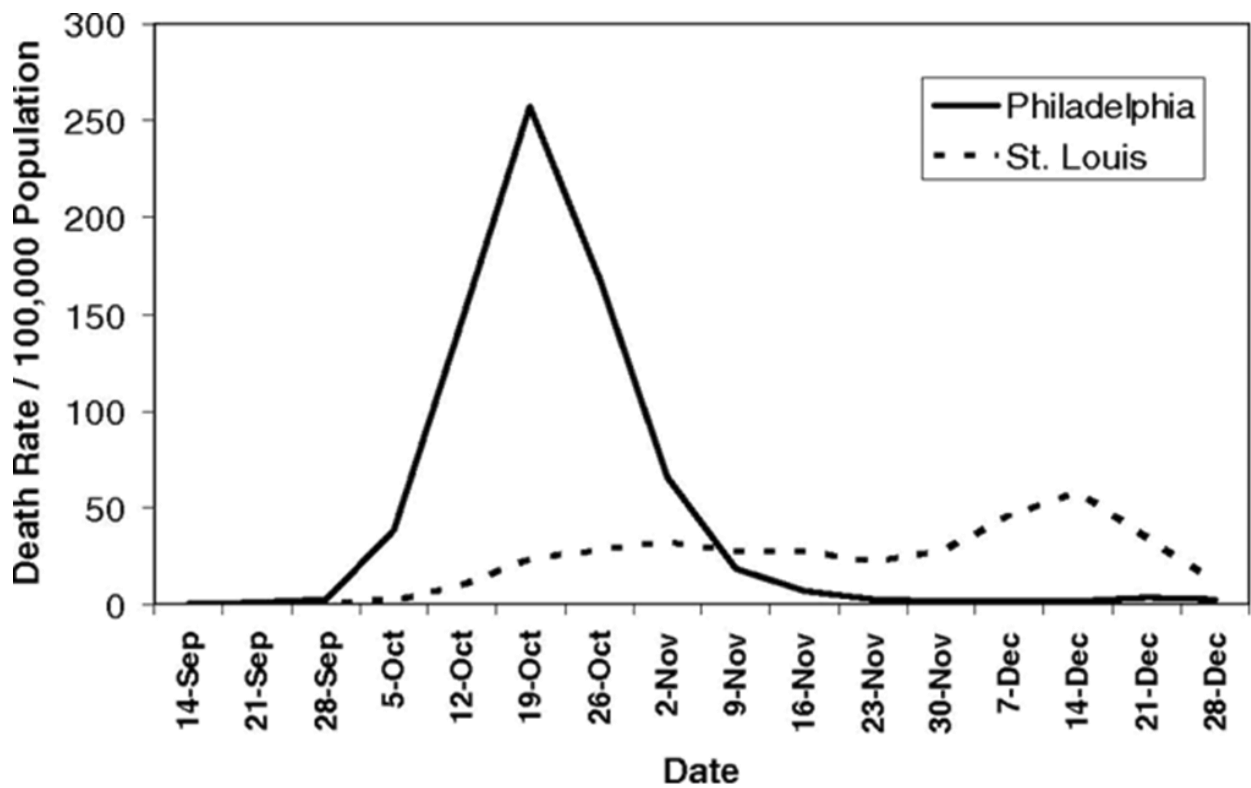

Life expectancy of a few Nations.

USA Pay over time

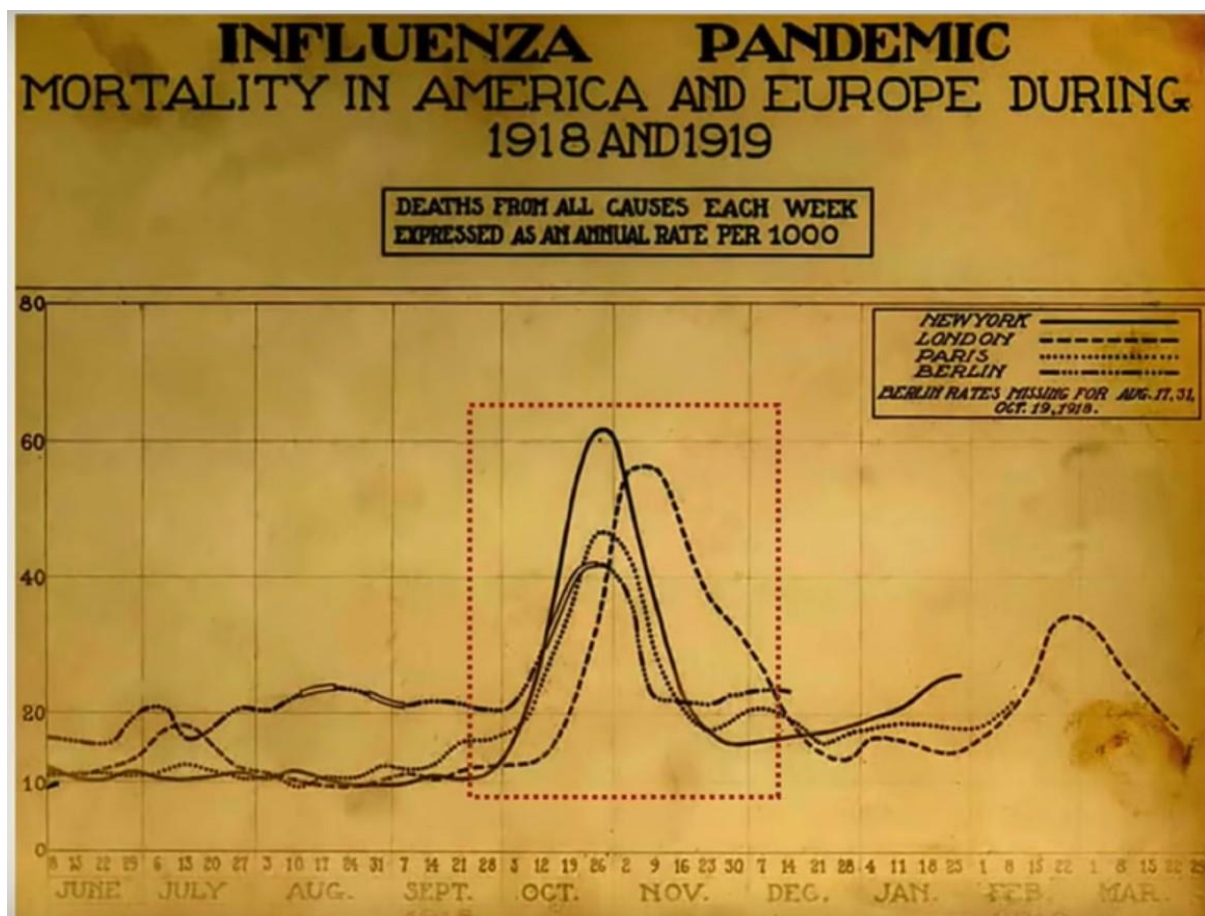

Hourly pay in US industries over time.

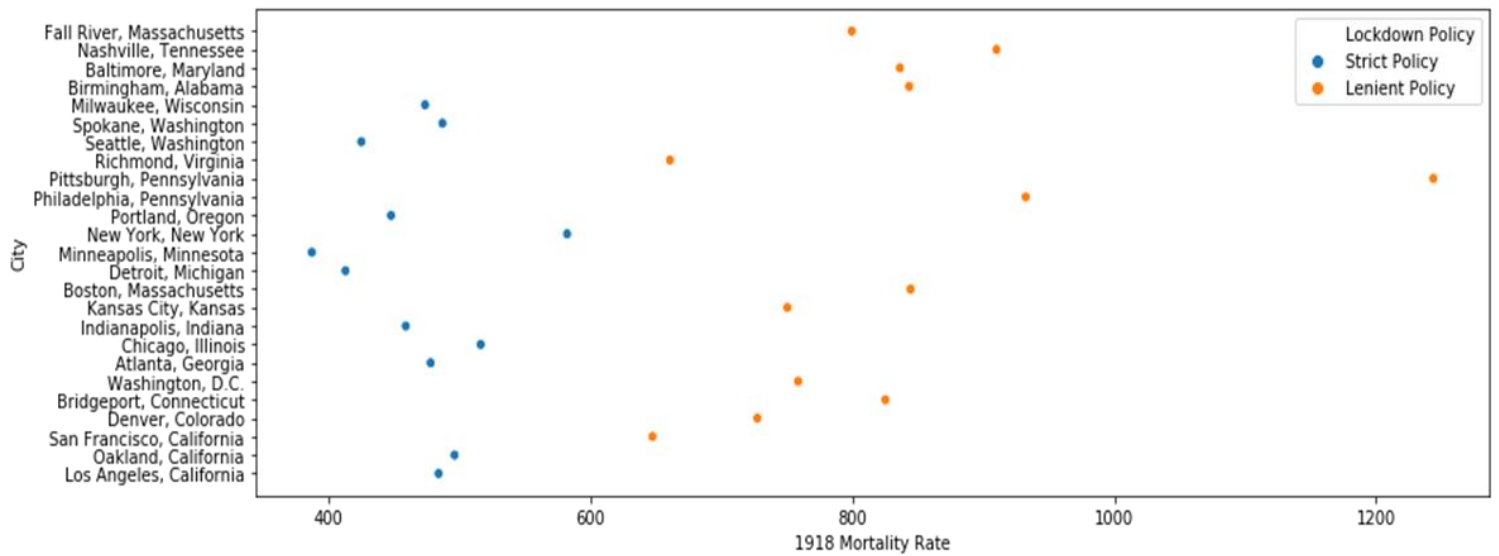

How Philadelphia failed to flatten the curve due to improper lockdown measures, but St Louis was able to contain it by following strict lockdowns.

Common remedies published in Spain about the flu.

A newspaper clipping showing mortality rates.

US Cities based on mortality rate in 1918 (per 100,000 people) as on basis of strict or lenient lockdown policy.

Thank You.
